¹Aged 16yrs plus in employment the week before the 2011 Census. ²Commute within area or Home workers (work mainly at or from home). ³Includes Offshore and Outside of UK. ⁴The difference between Out and In commuting.

% of Resident Workers

% of Workplace Workers

Local Authority or No Fixed Place (% self-containment)

Out-commuting

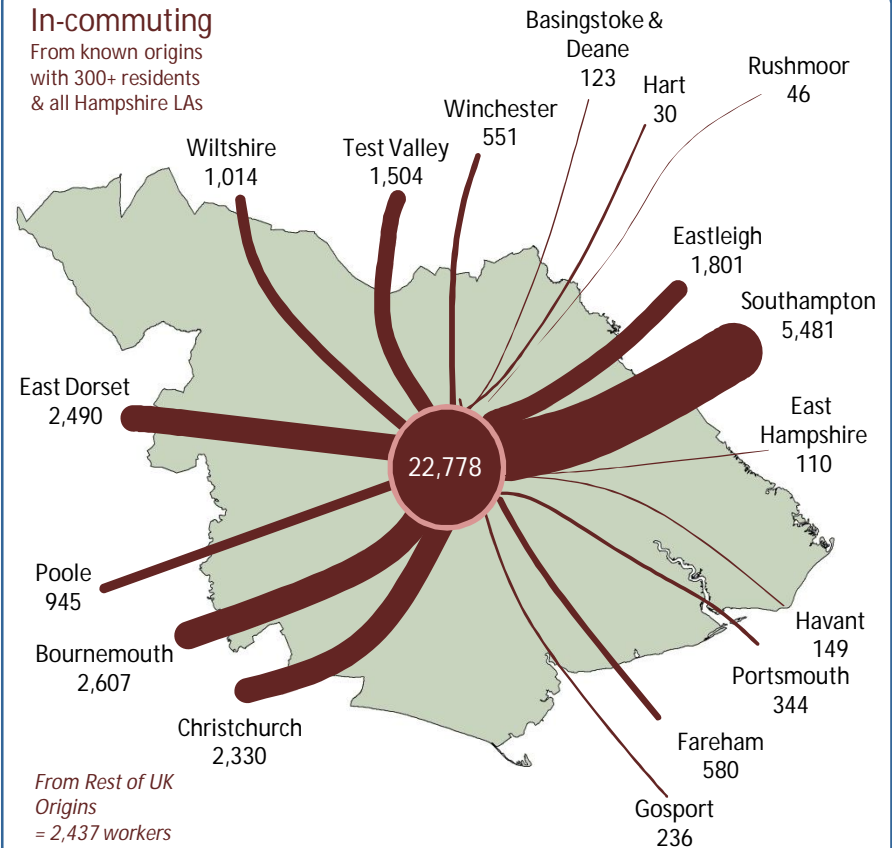

To known destinations with 300+ residents & all Hampshire LAs

To Rest of UK Destinations = 2,519 resident workers.
Offshore Installations & Outside UK = 313

In-commuting

From known origins with 300+ residents & all Hampshire LAs

From Rest of UK Origins = 2,437 workers

Commuter Flows and Main Method of Travel to Work

The Census 2011 commuter data measures workers aged 16yrs+, while Census 2001 data measures workers aged 16-74yrs. Comparisons between the census numbers should be used with caution due to the difference in age bands, natural population growth over time and economic conditions at the time of census collection which affect worker numbers. The percentage values provide a better relative comparison, although not strictly measuring like-for-like.

Top Five Destinations of Out-commuters

Number and percentage of total employed Resident Workers
Table ranked by Census 2011 figures with the figure for the same area given for 2001

Top Five Origins of In-commuters

Number and percentage of total employed Workplace Workers
Table ranked by Census 2011 figures with the figure for the same area given for 2001

Main Method of Travel to Work
