3416	Estates	Environmental Incident	2021-09-02 07 00:00	44441.29167	Uddens Drive - Ferndown. Cannon Hill and Uddens block.	A number of camper vans staying overnight. This is a very regular occurrence and we have had reports of trees being cut for firewood. One FC staff member passes this area daily and reports that some of the campers are living there almost permanently, both in the vans and in a tent in the woods. We are concerned about fire risk, theft of wood and human/domestic waste. The way they park also blocks access for heavy vehicles such as fire engines. Cannon Hill and Uddens are both popular dog walking woods and we have noticed a reduction in public use since the camper vans have been present. One of the people camping there [REDACTED] has been abusive to FC staff when challenged in the past.	1	50.80881	-1.92916	Environmental Incident

Very annoyed and couldn't understand why gas stoves were banned when it is not a BBQ disposable. I explained despite them taking a sensible approach being away from the bushes and having water encase of an emergency it sets a precedence for others particularly those who are not as experienced with it as them and therefore pose just as much risk as a disposable so we have chosen to ban all open flames. They had finished their food anyway so turned it off.	1			Near Miss
